Members of the Board, Peace be upon you,

Thank you for the opportunity to address any questions or concerns you may have (stopped there for your inject if necessary). I intend to honestly answer all question with the aid of my Private Counsel and Personal Representative. My years of detention have come at a personal cost. I lost my father, my mother's health continues to decline and my health is not at its best.

Through the Grace of Allah and with help from my family, I intend to start a business with skills that I have acquired through classes I attended during my detention. In addition to my previous training as an electrician, I strongly feel that I have the skills that would allow me to support myself and of my own. God willing!
